International Copper Association

Shenzhen Connector Industry Association  
China Institute of Energy Economics

The "2026 Shanghai International Industrial Materials Exhibition · Copper" (abbreviated as "Copper China") is a professional trade show and B2B platform for the copper industry and its key application sectors, jointly organized by RX China and the China Nonferrous Metals Fabrication Industry Association. The exhibition focuses on showcasing copper-based new materials, processed copper products, related machinery and equipment as well as auxiliary materials.

As a premier global business platform, Copper China unites industry resources to empower the copper manufacturing sector and its diverse downstream applications, offering industry players unparalleled opportunities to expand their market reach, uncover innovative solutions, pursue promising business ventures, and jointly drive sustainable progress across the industry.

## One Visit, Multiple Rewards, Endless opportunities

Discover, Connect, and Thrive at Copper China

### Explore Diversified Exhibits

Discover a wide range of new materials, advanced equipment, technologies, processes and solutions driving the future of copper processing and its main application industries

### Build Valuable Contacts

Expand your business network and connect with global industry insiders to foster meaningful relationships, accelerate innovation and drive sustainable growth

### Uncover Future Trends

Gain industry insights, discover future trends and optimize your strategic decision-making through high-level copper industry forum and exchange with experts

### Access Multiple Resources

Co-located with ALUMINIUM CHINA to enable seamless resource sharing and collaboration across non-ferrous metal sectors and key application industries and thus to unlock new business opportunities

## Exhibit Range

- Copper and copper fabricated products**  
Copper ingots, copper rods, copper plates, copper strips, copper tubes, copper wires, copper foils, copper bars, etc.
- Copper fabricating equipment**  
Rolling, extrusion, drawing, industrial furnace and related fabricating equipment
- Auxiliary materials**  
Refractory materials, intermediate alloys and additives, lubricating materials, etc.
- Engineering, technical services and consultation related to the copper industry**

## Visitor Scope

- Main application areas**
  - New energy vehicles
  - Energy storage and power batteries
  - Electronics and communication
  - Air conditioning and refrigeration
  - Wires and cables
  - Power equipment
  - Transportation
  - Mechanical manufacturing
  - Construction and building materials
  - Hardware
  - Other application areas
- Within the copper fabricating industry**
  - Copper materials and copper fabricating factories
  - Copper fabricating equipment buyers
  - Distributors or traders of copper materials or products

## Concurrent Tradeshow
